

Triad Technology Partners Extends ServiceNow Platform with Space Management Application

ServiceNow Preferred Services Partner Delivers Visual Space Planning Solution to Aid in Employee Onboarding, Asset Management, and Incident Management

BETHESDA, MD – November 19, 2013 - Triad Technology Partners, a Preferred ServiceNow Services Partner, today announced the availability of their Space Management application that extends the location tracking and visualization capabilities of the existing ServiceNow platform. Triad's solution provides real-time visual data needed to support faster on-boarding, more efficient work space grouping, and cost saving space consolidation decision making.

A leading provider of Cloud Solutions for Enterprise IT, Triad enjoys a leadership position within the industry and has earned a reputation for being a customer-focused and results driven organization. The Space Management solution is the most recent offering to be released from Triad Labs, Triad's ServiceNow Platform application innovation center.

"Triad is pleased to launch our Space Management application as an extension to the ServiceNow platform. This solution will augment the capabilities of ServiceNow, which does not currently offer visualization of space management for facilities, assets and employees", said Tim Hohman, CEO of Triad Technology Partners.

Through the use of this extension, ServiceNow customers are able to pinpoint optimal employee moves with customized space planning and reporting tools. Employee on-boarding and off-boarding is facilitated with a mapping capability complete with real-time floor plan images that show occupied and available spaces.

Triad's recently released ServiceNow platform extension for Space Management was featured at the ServiceNow NowForum held at the National Press Club in Washington, DC on October 30.
