Terms / Definitions	
ACV	Annual Contract Value
Process User	A Process User is any person accessing the system to actively manage the process of Incidents, Problems, Changes or Configuration Items as a normal course of their responsibilities. All Process Users require a license.
End User or Employee Self Service User	Employee Self Service provides for an unlimited number of individuals to access the system to perform the following functions; submit Incidents, check on the status of their own Incidents or to view the Knowledge Base. This functionality is provided at no cost and no license is required.
Discovery Server	Any non-virtual machine whose operating system is one of the following: Linux, Unix or any Windows version intended for Servers.
